PREFACE

This project was completed at the U.S. Army Natick Research and Development Command at the request of personnel of the Walter Reed Army Medical Center and was funded under Intra-Army Order for Reimbusable Services No. S 49193-7008.

The authors wish to thank the Analytical Branch of the Food Science Laboratory for performing the nutritional analyses. The assistance of Mr. Robert Scott and Miss Melanie Piscia in carrying out the sensory evaluations is also appreciated.

The following Food Engineering Laboratory personnel listed alphabetically were contributors to the efforts covered in this report:

Mrs. Jesse W. McNutt Miss Patricia A. Prell Mr. John L. Secrist Dr. George C. Walker Mr. Raymond G. Young

ENTREE PRODUCTION GUIDES FOR RESTRICTED DIETS AT WALTER REED ARMY MEDICAL CENTER PART III: DENTAL LIQUID ENTREES

FOREWORD

Cook-freeze systems are becoming increasingly important in the Armed Forces feeding systems, as well as in hospital feeding, both military and non-military. The construction of a new Walter Reed Army Medical Center (WRAMC) using a cook-freeze system resulted in the development at the U.S. Army Natick Research and Development Command (NARADCOM) of 38 guides designed for this system. These guides, published in Technical Report Natick/TR-77/005¹, were designed for regular hospital feeding, either for patients on nonrestricted diets or for cafeteria use. Other production guides for military cook-freeze systems have been published at NARADCOM.², 3, 4, 5, 6

At the request of personnel at WRAMC, production guides for modified or restricted diets have been developed at NARADCOM. The dietary restrictions follow the guidelines prescribed by the dietary staff at WRAMC. The requests for production guides for entrees fall into five major categories, each of which are the subjects of Technical Reports:

- Part I: Consolidated Modified Meat Entree Production Guides 7 for patients on:
 - a. Calorie restricted, type II, hyperlipoproteinemia diabetic, bland diets.
 - b. Sodium restricted, calorie restricted, type II, hyperlipoproteinemia, diabetic, bland diets.
- Part II: Pureed Bland Entree Production Guides for patients unable to chew regular entrees.
- Part III: Dental Liquid Entree Production Guides 9 for patients on a liquid diet.
- Part IV: Meat Substitute Entrees 10 for patients not desiring to eat meat, fish, or poultry.
- Part V: Renal diet items 11 for patients with restricted protein, potassium and sodium intake.
- ⁷C. Shaw, G. Darsch, G. Legris, Y. Masuoka and J. Tuomy; Entree Production Guides for Modified Diets at Walter Reed Army Medical Center, Part I: Consolidated Modified Meat Entrees. Natick/TR-79/010 1979.
- ⁸C. Shaw, V. Loveridge, G. Darsch and J. Tuomy; Entree Production Guides for Modified Diets at Walter Reed Army Medical Center, Part II: Pureed Bland Entrees. Natick/TR-79/011 1979.
- ⁹C. Shaw, V. Loveridge, G. Darsch and J. Tuomy; Entree Production Guides for Modified Diets at Walter Reed Army Medical Center, Part III: Dental Liquid Entrees. Natick/TR-79/012 1979.
- ¹⁰G. Darsch, R. Young, C. Shaw and J. Tuomy; Entree Production Guides for Modified Diets at Walter Reed Army Medical Center, Part IV: Meat Substitute Entrees. Natick/TR-79/013 1979.
- J. McNutt, M. Branagan, J. McPhee, L. Albertini and M. Klicka; Entree Production Guides for Modified Diets at Walter Reed Army Medical Center, Part V: Production Guides for Patients on Renal Diets. Natick/TR-79/014 1979.

Type II hyperlipoproteinemia diets are low in unsaturated fats and cholesterol. Because these diets are also restricted in calcries, all fats have been restricted.

The first section, Part I, of Modified Diets consolidates several different types of diet restrictions, thus allowing the hospital to drastically reduce the number of special diets needed. By careful formulation, these products have retained high flavor quality. The second section, Part II, includes diets designed to upgrade the quality and vary the types of pureed diluted foods or commercial baby foods that are usually served to patients requiring a bland diet of pureed consistency. The third type of diet in Part III, the Dental Liquid, represents a totally new concept in liquid feeding. The production guides in this section make up liquid foods having the taste of a regular entree. Thus, instead of drinking sweet milkshake-type products, a patient can order such liquids as chicken curry, ham with raisin sauce, or veal paprika. The fourth section, Part IV, contains production guides for entrees not containing meat, fish, or poultry. These are designed for the increasing numbers of vegetarian patients. Part V, Renal Diets, consists of eight very carefully weighed entrees and one dessert. These items are designed to give some variety in the diet for the patient with renal dysfunction where calories, protein, sodium, and potassium need to be carefully monitored.

For use in the WRAMC facility, all of the production guides, except those for the Renal Diets, have been written in 100-portion servings using both English and metric units and English volumes of liquids. Percentages of each ingredient are given to allow easy conversion to various sized batches. In order that these guides may be helpful to smaller military hospitals, ten serving portions are given, using common (US customary) kitchen measurements. Production guides for the renal diets are based on percentages, twenty-five portions in both metric and customary units and one-portion servings in metric units. Directions for serving the products without the freezing process are given for the benefit of small hospitals which may not have freezing capabilities.

INTRODUCTION

The twenty pureed bland entree production guides published in this report will be used by a varied group of hospital patients. Probably the largest group of users will be geriatric patients lacking teeth. Other conditions, such as oral cancer, ulcers, hiatal hernias, or dental surgery may necessitate a pureed bland diet. In actuality, a true puree is not necessary. The suggestions for particle size and texture given by WRAMC personnel were that the foods should be similar in texture to junior baby foods and should be easily consumable by patients without teeth.

Most hospitals currently use one of two approaches in feeding patients requiring pureed bland diets. Either the patients are fed commercial baby foods or they are fed other bland hospital foods which are diluted and pureed. Formulating products for the specific end use of consumption by adult patients offers certain advantages. When one formulates specifically for the consumer, superior flavor and texture can be achieved. With herbs and other seasonings allowable on bland diets, these foods do not have to taste "bland". The twenty entrees developed, provide a wide range of flavors in the types of entrees that a consumer might eat on a regular diet. Including three ounces of cooked meat per entree assures adequate protein.

PROCEDURE

A list of possible pureed bland entrees was sent to NARADCOM by WRAMC personnel. Many items from this original list were substituted when it was found that other entrees would provide a better variety in the diet or would be more adaptable to a pureed item. Twenty pureed bland entrees were developed, These include eight beef, four chicken, three ham, one lamb, three pork, and one veal item.

Small batches of each product were made by food technologists at NARADCOM and reformulated until a satisfactory product was obtained. When acceptable formulations were developed, larger scale production batches were made. Samples were formally evaluated by a ten-member technological panel for the sensory qualities of color, odor, flavor, texture, and appearance. Results of these evaluations may be found in Table 1. Results of proximate nutritional analyses may be found in Table 2. Storage tests of these products are being undertaken at 0°F (-18°C) with sensory evaluations being made at 3, 6, and 12 months. The results of these storage studies will be published upon completion and will give an indication of the shelf life of the products.

Pureed, Bland

PROCEDURE:

- 1a. Brown ground beef in kettle.
 - b. Drain juices (broth) and reserve for step 3a.
 - c. Refrigerate and reserve cooked, ground beef for step 4c.
 - 2a. Melt margarine.
 - b. Make a roux with flour.
- 3a. Combine ingredients listed in section 3 of ingredients listing, reserving some water for step 4a. Juices (broth) reserved in step 1b may be used to satisfy all or part of the water requirement.
 - b. Add combined ingredients to roux and heat to 160°F (72°C).
 - 4a. Make a starch slurry using water reserved from step 3a.
 - b. Add starch slurry to above and heat to 180°F (82°C).
 - c. Add beef from step 1c.
 - d. Add back water to maintain formula weight or volume.
- e. Blend on low speed in vertical cutter-mixer or equivalent blender on low speed for approximately 30 seconds. For reference, particle size should be a maximum of 0.20 in. (5 mm).
 - f. Cool to about 50°F (10°C).
 - g. Place 6 oz (170 g) in individual containers.
 - h. Cover, label, and freeze.

Pureed, Bland

NOTES:

- 1. Formula includes 10% overrun. Theoretical yield for 100 portions: 110 servings. Theoretical yield for 10 portions: 11 servings.
- 2. Formula is based on a 75% yield of ground beef. Weight of cooked beef for 100 portions should be approximately 20.6 pounds (9.3 kg).
- 3. Final weight of 100 servings is 41 lb (18.5 kg). Final volume of 100 servings is 4.7 gal (17.7 L). One gallon (3.8 L) weighs 8.7 lb (3.9 kg).
- 4. To serve without freezing, follow directions through step 4e, but do not cool meat or gravy. Serve 6 oz (170 g) portions of heated product.

Pureed, Bland

PROCEDURE:

- 1a. Brown ground beef in kettle.
- b. Drain juices (broth) and reserve for step 3a.
- c. Refrigerate and reserve cooked, ground beef for step 4c.
- 2a. Melt margarine.
- b. Make a roux with flour.
- 3a. Combine ingredients listed in section 3 of ingredients listing, reserving some water for step 4a. Juices (broth) reserved in step 1b may be used to satisfy all or part of the water requirement.
 - b. Add combined ingredients to roux and heat to 160°F (71°C).
 - 4a. Make a starch slurry using water reserved from step 3a.
 - b. Add starch slurry to above and heat to 180°F (82°C).
 - c. Add beef from step 1c.
- 5a. Finely chop mushroom pieces from Section 5 of ingredients listing and add to above.
 - b. Add back water to maintain formula weight or volume.
- c. Blend on low speed in vertical cutter-mixer or equivalent blender for approximately 35 seconds. For reference, particle size should be a maximum of 0.20 in. (5 mm).
 - d. Cool to about 50°F (10°C).
 - e. Place 5 1/2 oz (156 g) in individual containers.
- 6a. Chop mushrooms from section 6 of ingredient listing into 1/4 in. (6 mm) pieces.
- b. Sprinkle approximately 1/2 oz (14 g) chopped mushrooms over each individual portion for a garnish.
 - c. Cover, label, and freeze.

Pureed, Bland

NOTES:

- 1. Formula includes 10% overrun. Theoretical yield for 100 portions: 110 servings. Theoretical yield for 10 portions: 11 servings.
- 2. Formula is based on a 75% yield of ground beef. Weight of cooked beef for 100 portions should be approximately 20.6 pounds (9.3 kg).
- 3. Final weight of 100 servings excluding mushrooms weighs 38 lb (17.2 kg). Final volume of 100 servings is 4.3 gal. (16.2 L). One gallon (3.8 L) weighs 8.7 lb (3.9 kg).
- 4. To serve without freezing, follow directions through step 5c, but do not cool meat or gravy. Serve 5 1/2 oz (156 g) portions of heated product and garnish with 1/2 oz (14 g) of chopped mushrooms.

Pureed, Bland

- 1a. Steam chicken breasts at 15 p.s.i. (103 kPa) for approximately 20 minutes to an internal temperature of 160° F (71° C).
 - b. Cool to about 80°F (27°C) to facilitate handling.
 - c. Remove cartilage and bone from skinless chicken breasts.
 - d. Cool chicken to about 50°F (10°C).
 - e. Grind chicken through a 3/16 in (5 mm) plate.
 - f. Refrigerate and reserve cooked, ground chicken for step 4d.
 - 2a. Melt margarine.
 - b. Make a roux with flour.
- 3a. Combine ingredients listed in section 3 of ingredients listing, reserving some chicken broth for step 4a and mix well to disperse nonfat dry milk solids.
 - b. Add to roux and heat to 160°F (71°C).
 - 4a. Make a starch slurry using chicken broth reserved from step 3a.
 - b. Add starch slurry to above and heat to 180°F (82°C).
 - c. Add chicken from step 1f.
 - 5a. Add chopped pimentos.
 - b. Add back water to maintain formula weight or volume.
- c. Mix on high speed in mechanical mixer (Hobart or equivalent) for approximately 1 minute. For reference, particle size should be a maximum of 0.20 in (5 mm).
 - d. Cool to about 50°F (10°C).
 - e. Place 6 oz (170 g) in individual containers.
 - f. Cover, label, and freeze.

Pureed; Bland

- 1. Formula includes 10% overrun. Theoretical yield for 100 portions: 110 servings. Theoretical yield for 10 portions: 11 servings.
- 2. Formula is based on a 75% yield of chicken. Weight of boneless, cooked, ground chicken for 100 portions should be approximately 20.6 lb (9.3 kg). A combination of light and dark meat chicken may be substituted for chicken breasts.
- 3. Final weight of 100 servings is 41 lb (18.6 kg). Final volume of 100 servings is 4.8 gal (18.2 L). One gallon (3.8 L) weighs 8.6 lb (3.9 kg).
- 4. To serve without freezing, follow directions through step 5c, but do not cool chicken or gravy. Serve 6 oz (170 g) portions of heated product.
- 5. In the event that the broth from the chicken steaming operation can be saved, this broth should be used in satisfying the chicken broth requirements in section 3.

Pureed, Bland

 - b. Grind pork through a 3/16 in. (5 mm) plate.
 - c. Brown ground pork in kettle.
 - d. Drain juices (broth) and reserve for step 3a.
 - e. Refrigerate and reserve cooked pork for step 4c.
- 2a. Combine drained pineapple and vinegar listed in section 2 of ingredient listing.
- b. Mix on low speed in vertical cutter-mixer for about 20 seconds or until well blended.
- 3a. Combine ingredients listed in section 3 of ingredient listing, reserving some water for step 4a. Juices (broth) obtained in step 1d may be used to satisfy all or part of the water requirement.
 - b. Add to pineapple and vinegar mixture above.
 - c. Heat to 160°F (71°C).
 - 4a. Make a starch slurry with water reserved from step 3a.
 - b. Add starch slurry to above and heat to 180°F (82°C).
 - c. Add pork from step 1e.
 - d. Add back water to maintain formula weight or volume.
- e. Blend (on low speed) in vertical cutter-mixer for approximately 40 seconds. For reference, particle size should be a maximum of 0.20 in (5 mm).
 - f. Cool to about 50°F (10°C).
 - g. Place 6 oz (170 g) in individual containers.
- 5a. Place 4 g of pineapple chunks on each individual serving for a garnish.
 - b. Cover, label, and freeze.

Pureed, Bland

- 1. Formula includes a 10% overrun. Theoretical yield for 100 portions: 110 servings. Theoretical yield for 10 portions: 11 servings.
- 2. Formula is based on a 35% yield of pork. Weight of ground pork for 100 portions should be approximately 20.6 lb (9.3 kg).
- 3. Final weight for 100 servings is 41 lb (18.5 kg). Final volume of 100 servings is 5.0 gal (18.9 L). One gallon (3.8 L) weighs 8.2 lb (3.7 kg).
- 4. To serve without freezing follow directions through step 4d, but do not cool meat or gravy. Serve 6 oz (170 g) portions of heated product and garnish with approximately 4 g of pineapple chunks per serving.

Pureed, Bland

Ingredients

Meat, Poultry, and Fish

1. Pork, loin, frozen - NSN-8905-00-935-0618, Fed. PP-P-571, Style B.

Fruits and Vegetables

2. Pineapple, canned, chunks or tidbits - NSN-8915-00-403-8534, Fed. Z-F-1742/23.

Sugar, Confectionery, and Nuts

3. Sugar, brown - NSN-8925-00-127-7328, Fed. JJJ-S-791, Type II.

Condiments and Related Products

- 4. Salt, table, iodized NSN-8950-00-262-8886, Fed. SS-S-31.
- 5. Soy sauce NSN-8950-00-935-3254, Fed. EE-S-610,
- 6. Vinegar, cider NSN-8950-00-221-0297, Fed. Z-V-401, Type I, Strength B, (5%).

Special Procurement

- 7. Pineapple, crushed, canned, in natural juices.
- 8. Starch, Col-Flo 67.

Pureed, Bland

- 1a. Place boneless veal roasts in oven at $325^{\circ}F$ ($163^{\circ}C$) and roast to an internal temperature of $160^{\circ}F$ ($71^{\circ}C$). Remove crust from meat.
 - b. Cool veal to about 50°F (10°C).
 - c. Grind veal through a 3/16 in. (5 mm) plate.
 - d. Refrigerate and reserve cooked, ground veal for step 3c.
- 2a. Combine ingredients listed in section 2 of ingredients listing, reserving some water for step 3a.
 - b. Heat to 160°F (71°C).
 - 3a. Make a starch slurry with water reserved from step 2a.
 - b. Add to above and heat to 180°F (82°C).
 - c. Add cooked, ground veal from step 1d.
 - d. Add back water to maintain formula weight or volume.
- e. Blend on low speed in mechanical mixer (Hobart or equivalent) for approximately 15 seconds. For reference, particle size should be a maximum of 0.20 in. (5 mm). Do not over mix.
 - 4a. Cool to about 50°F (10°C).
 - b. Fold in sour cream.
 - c. Place 6 oz (170 g) in individual containers.
 - d. Sprinkle paprika over each portion for a garnish.
 - e. Cover, label, and freeze.

Pureed, Bland

- 1. Formula includes a 10% overrun. Theoretical yield for 100 portions: 110 servings. Theoretical yield for 10 portions: 11 servings.
- 2. Formula is based on a 70% yield of veal. Weight of cooked, ground veal for 100 portions should be approximately 20.6 lb (9.3 kg).
- 3. Final weight of 100 servings is 41 lb (18.6 kg). Final volume of 100 servings is 5.0 gal (18.9 L). One gallon (3.8 L) weighs 8.2 lb (3.7 kg). Water is added back before sour cream is added. Without sour cream, volume is 4.1 gal (15.5 L) and weight is 33.8 lb (15.3 kg).
- 4. To serve without freezing, follow directions through step 4a, but do not cool meat or sauce. Serve 6 oz (170 g) portions of heated product and sprinkle with paprika for a garnish.

Pureed, Bland

Ingredients

Dairy Foods and Eggs

1. Cream, sour - NSN-8910-00-890-1536, Fed. C-C-678, Type I.

Fruits and Vegetables

2. Tomato paste - NSN-8915-00-582-4058, Fed. JJJ-V-1746/23, Type I, concentration d, texture 1.

Condiments and Related Products

- 3. Paprika, ground NSN-8950-00-170-9563, Fed. EE-S-631.
- 4. Salt, table, iodized NSN-8950-00-262-8886, Fed. SS-S-31.
- 5. Vinegar, distilled NSN-8950-00-221-0297, Fed. Z-V-401. Type II, Strength B (5%).

Special Procurement

- 6. Starch, Col-Flo 67.
- 7. Veal, boneless, clod roasts.
